Product Description

Bobcat S86 Skid-Steer Loader

Only the S86 offers three hydraulic flow options - standard, high and super flow - in one skid-steer loader, setting a new industry standard in performance and attachment versatility.

The S86 features an optimized weight-to-horsepower ratio that ranks this vertical-lift machine among the industry's most powerful, maneuverable, efficient and productive in its size class.

Premium Power Performance, the skid-steer's power management system, further sets this machine apart. Designed to boost productivity, the system improves engine-to workgroup efficiency, distributing more power where and when it's needed during multi-tasking operations. Smoother, faster control, with maximum power where and when you need it most - means more work done per day.

The S86 is in a class all by itself. It's the most powerful skid-steer we've ever built, delivering more usable engine and hydraulic power than ever before. With power and comfort like you've never experienced before, the feature-rich S86 will take your productivity to another level.

- Premium Power Performance - an intelligent power management system, when equipped with high- or super-flow hydraulics
 - An industry-first three hydraulic flow options in one machine
 - Non-DPF Bobcat engine
 - High-performance cooling system
-
